Total building area (sq. ft.): 57,600
Construction cost/sq. ft.: \$155
Total cost (excluding land): \$8,900,000

The home of the Radiology Complex & Women's Imaging Center is a new, state-of-the-art, freestanding facility located east of downtown Tallahassee, at the corner of Mahan Road and Phillips Drive. Set back from the road and carved into the landscape, the building

was sited on a sloping green lawn, providing sweeping views of this elegant and decidedly modern structure.

With some features resembling a modern hotel, rather than a conventional medical building, the facility was clearly designed with the patient's

needs and comfort in mind. Generous landscaping and lighting were planned for the site, along with a pedestrian walkway linking parking areas to the main entry. Ample parking areas provide many spaces close to the building for disabled visitors.
